CONTRACT APPROVAL

Pursuant to your request of 16 November 1955, CMCC Doc. No. 151.743, approval is hereby granted to lease additional space for use by the Communications Division in performance of work called for under Contract No. A-101. It is understood that the magnitude of such contract work has made the present Communications Division space inadequate in view of the required delivery schedule under the contract and that in order to perform the contract work on schedule, additional space is necessary immediately.

25X1

It is understood that appropriate space is available at [redacted] Avenue, such space consisting of some 20,000 sq. ft. Representatives of the undersigned have certified that additional space is necessary. Such representatives have examined the proposed space and have reviewed the proposed leasehold improvements and have advised that from both location and nature of the space it would appear that acquisition of the space for Contract A-101 would be desirable and that the proposed leasehold improvements are reasonable and compatible with the general nature of the present facilities.

Accordingly, the instant approval endorses the need for additional space for work being performed under Contract No. A-101 and endorses the location suggested. In view of the fact, however, that the cost of such additional facility is an overhead item, it will also be necessary for your cognizant local government representatives to review and approve any specific facility acquisition arrangements which result in a charge to the government overhead pool at your plant. It is understood that your proposed method of acquisition of the needed facility is under study by such representatives.

It is requested that you keep the undersigned informed of the progress being made with your local government representatives in arriving at a mutually agreeable solution to the problem of costing the facility acquisition to overhead.
